Anas Nedal Ramadan Helles

Cybersecurity Engineer

About me

- A **Cybersecurity** proficient in multiple programming languages, committed to continuous daily learning and skill refinement. I leverage my advanced English proficiency to stay ahead of rapid tech trends, aiming to contribute my energy and technical expertise to a professional and innovative environment.

Key Skills

- JavaScript
- React
- Node.js
- Python
- Agile Methodologies

Experience Overview

- Experienced in contributing to secure web application development and system optimization with a focus on cybersecurity. Proficient in multiple programming languages and dedicated to daily skill advancement, consistently collaborating within professional teams to deliver high-quality, protected software solutions 2024.

- Specializes in designing intelligent, seamless database architectures and managing data environments with a strict focus on integrity and protection. Contributes to developing high-performance data systems and secure infrastructures, while continuously expanding programming expertise to deliver scalable, well-protected, and data-driven solutions

Education Background

- CS50's Introduction to Computer Science | Harvard University
- Demonstrated proficiency in C, Python, and SQL, with a focus on algorithmic problem-solving and memory management.

Associate of Science in Programming and Development

Institution: Community College of Innovation

Year of Graduation: May 2016

- Graduated with Honors
- Recipient of the Academic Excellence Award
